MD & CEO
ICICI Lombard General
Insurance Co Ltd., Mumbai

2019-21

CONVOCATION 2019-21

33rd

CONVOCATION

2019-2021 Batch

12th FEB, 2022

THE FUTURIST CEO "EQ NOT IQ MATTERS IN THE CORPORATE WORLD"

Mr. Bhargav Dasgupta

MD & CEO

ICICI Lombard General Insurance Co Ltd.

"The one thing which I learned from one of my professors at IIM Bangalore, the worth of which I realized much later in life, i.e. Customer is King, do everything in your business keeping this as the baseline of your operations and nothing can stop you from achieving your goal."

"You are the best of the best, yet you must learn to set aside ego; because the ego is inversely proportional to success; develop a learning mindset; work on your EQ because EQ, not IQ, matters in the corporate world; be resilient because failure teaches you much more than success; pay attention to Organizational Behaviour lessons because it's not just domain excellence in Finance or Marketing but OB that will hold you in good stead when you lead teams; forge firm friendships here because it's friends who will come to your rescue in times of crises."

"Wherever I go people attach the insurance background with my name and everyone tends to think that this guy's here to sell insurance to us. I would like to tell them all that it is much more than that and for us, the customer is the king"

Speaking at his Alma Mater, IIM Bangalore

**"A TECH COMPANY THAT
DOES INSURANCE"**

An engineer by heart, a management professional by nature, and an insurance veteran by choice, Mr. Bhargav Dasgupta, MD and CEO of ICICI Lombard general insurance co. is the perfect example of how to be a thorough gentleman and a razor sharp corporate brain, who has what it takes to make a company, a corporate giant.

Mr. Dasgupta did his B.E. (Mechanical) degree from Jadavpur University and is an alumnus of IIM Bangalore. He is a member of IRDAI's Insurance Advisory Committee and the Chairman of FICCI's Insurance & Pension Committee.

He began his career in 1992 with the then-ICICI Limited, and he has held key positions in the ICICI Group's Project Finance, Corporate Banking and Treasury, E-commerce, Strategy, International Banking, and Life Insurance businesses. COO – ICICI Econet Limited, where he was in charge of private equity investments in the internet, communications, and technology sectors, as well as the incubation of new internet-related enterprises and e-initiatives of the ICICI group's different business divisions. He also established ICICI Bank's International Banking Group, which grew to 15 countries in four years. At Harvard Business School, he pursued International Banking business strategy. He was Executive Director of ICICI Prudential Life Insurance from October 2006 to May 2009, before his present position at ICICI Lombard.

Named as one of the Top 50 CEOs in 2022 in India recently by Startup Lane, Mr. Dasgupta keeps customer-centricity as his prime philosophy. Under his able tutelage, ICICI Lombard has made great strides which is a source of great pride and joy for all of us.

"Bhargav Dasgupta's philosophy of customer centricity has enabled the company to introduce several 'best-in-class' risk management solutions backed by the latest technology platforms to meet the risk mitigation needs of its customers," says Shishir Gupta - Founder and CEO of Startup Lanes on this achievement.

STAIRS TO GROWTH: UPWARD AND ONWARD

"I think the biggest thing is for organizations to stay closer to the ground and retain humility-especially when they are growing bigger."

Since assuming the post in 2009, the company has grown to become the country's largest private non-life insurance company, continuously generating long-term value to its stakeholders. ICICI Lombard is also the first non-life insurance company to be listed on the Indian stock markets. Bhargav's customer-centric strategy has allowed the firm to create various "best-in-class" risk management solutions backed by cutting-edge technology platforms to fulfill its clients' risk reduction needs.

Mr. Dasgupta started his career in 1992 with the former ICICI Limited and has held key executive positions in the ICICI Group's Project Finance, Corporate Banking and Treasury, E-commerce, Strategy, International Banking, and Life Insurance businesses.

Under his wing, ICICI Lombard won the Emerging Company of the year award at the ET Awards for Corporate Excellence, 2020.

Because ICICI Lombard has just recently begun experimenting in the retail sector, it is impossible to forecast how consumers would act with precision. However, they realized people appreciate it in the corporate sector since practically every reasonable company takes insurance to protect itself from danger. So, if you can show clients that some of these skills may help insurers minimize claim frequency, this will benefit the client in the long run by lowering the premium. As a result, it's a win-win-win situation. It is advantageous to the client. It benefits the business and, to be honest, the economy and society as a whole.

ICICI Lombard has become the largest private sector general insurer.

"There are no shortcuts to creating a customer-centric organization. It gets built brick by brick when a company has a committed leadership and a drive to make it happen."

FIVE PILLARS

He built this institution on 5 foundational pillars,

- First and foremost is Customer trust and Insurance is a promise to pay when one is in difficulty
- The second pillar is the resilience of leadership
- Third and one of the most important is a sharp focus on technology-led innovation
- Fourth is risk management and capital preservation
- Finally the fifth is the promotion of entrepreneurship, ownership, and empowerment within the team

Mr. Dasgupta thinks ICICI Lombard is a tech company that also provides insurance as according to him, every company in today's day and age should have the mindset and agenda to drive their business through technology-led innovation.

MANOUEVERING CURVEBALLS

One of his key works at ICICI Lombard was his role in revamping the organization's collective vision after the financial crisis of 2008. The industry was much smaller and weighed more competitively, the prices dropped due to de-tariffication and there were challenges in calibrating.

According to Mr. Dasgupta, the biggest thing is for the organizations to stay closer to the ground and retain humility especially when one is growing bigger and bigger.

LEAD BY EXAMPLE

As the MD and CEO of ICICI Lombard, he never forgot about his role in promoting wellness and inspiring the team. He has run nine half marathons and a marathon (Berlin 2017) so far.

In an interview with the Live Mint, he said "As the adage goes, practice before you preach. I strongly believe in this when it comes to leading by example. We are a health insurance company and strive to partner with our customers for their health and fitness. When we take the lead in implementing what we ourselves say, that's when our credibility will be high."

As the cliché goes, practice makes perfect. When it comes to leading by example, Mr. Dasgupta is a firm believer. ICICI Lombard is also a health insurance company that aims to work with its customers to improve their health and fitness. The credibility of senior management will be strong when they take the lead in implementing themselves.

THE BIGGER PICTURE

The insurance ecosystem has seen tremendous transformations, with increasing digital adoption and customer-centricity at the forefront. This is the point he emphasized at the India Innovation Summit organized by the Confederation of Indian Industry where he said "With the continued focus on innovation and transformation here to stay, the key to progress for organizations is to be agile, experiment, and evolve in tandem with the changing world".

Despite stiff competition in the non-life private insurance market ICICI Lombard General Insurance co. has carved its way to the top just because they have such enterprising, down-to-earth, practical, humble, and professional people like Mr. Dasgupta at the helm of operations in the organization.

Excerpts from his Leadership Talk @BIMTECH with Prof. (Dr.) Abhijit K. Chattoraj

On Technology

If you look at the Indian industries' profit after tax from 2008-2020, in 12 years, you would expect maybe some 5% compounded growth. But the industry is de-grown by 12% compounded; as in we were earning 4-5 times more as an industry in 2008. As an industry, we are actually loss-making. Profit after tax of the industry was -1400crores. But if you look at the four top companies in terms of profitability, it is close to 4000 crores. It means some companies are losing out and are not able to invest in technology. If you think about running a business you have to think about all stakeholders including the shareholders. The bigger damage this does is that you become very irresponsible about paying claims. Making some reasonable profit is important for investment in distribution, and for technology in penetration. One of the reasons why I believe penetration hasn't happened is because we have not invested as an insurance category.

On Analytics

It's vital. I keep saying that. You know insurance is probably the original data sciences industry. Today everyone talks about data and data science, and insurance is an industry that used a mathematical model to look at data. We have kind of lost a bit of our computer advantage from those days, but that's the way to think of building your business in the future. We talked about creating something useful for customers using customer data. As an industry, we are transactional at a product level. Today a digital platform may be an app-based platform where customers are willing to share their health assessments, step counts, wellness platform that they are operating on the behavior that they have in terms of exercising. You can use this data to potentially give them some certain benefits like extra cover or freebies. Coming to AI and ML today, we can do that. We don't get a doctor to get 60% claims. It is done through a machine learning engine that we built a couple of years back. That's because we have a lot of data from the past which we used to train the engine. Today we don't need a surveyor to inspect the motor accident but an app can do it. Frauds we use analytics engine, every part of our business data is vital and that's how you can stay ahead in this very competitive industry.

On Skills

The one answer that I have for anyone in any industry is, whichever industry you go in first, try to understand the industry; understand whether what that industry does, is appealing to you. At the end of the day, your value system and the industry's value system have to align.

On Innovation

I have consistently pushed for using technology to provide innovative solutions, as a result of which the company introduced many firsts in the industry, such as virtual inspection in the motor, bots which issue quotations for corporate customers, and use of natural language processing to reduce health claim approval time. In the past five years that I have worked with the organization, I have experienced first-hand how these solutions not only help solve customer problems, but also make day-to-day lives easier. His other great contribution has been building a culture where employees are empowered to take decisions, it is a testament to his leadership. For a man who does so much he also somehow manages the time to read and keep himself updated on the developments across the world. Indeed, his bookshelf which we can see on many calls and even currently we can see is an object of envy amongst many of us.

"If you think about running a business you have to think about all stakeholders including the shareholders."
