Programme Overview

This transformative program equips educational leaders with the knowledge and skills to cultivate a culture of innovation and prepare students for the future. Participants will delve into cutting-edge concepts like whole-brain leadership, child entrepreneurship, and design thinking. By integrating these principles with a deep understanding of digital technologies and personalized learning, participants will gain the tools and confidence to empower students as critical thinkers, problem-solvers, and future innovators.

Programme Objectives

- Equip participants with the knowledge and skills of whole brain leadership and its application in educational settings.
- Foster an understanding of child entrepreneurship and its role in developing innovative thinking.
- Develop practical skills in design thinking and its application in collaborative problem-solving within school settings.
- Explore the impact of digital technology on education and the effective integration of digital tools and platforms.
- Enhance participants' understanding of data-driven instruction and personalized learning approaches.
- Develop effective mentorship skills for guiding and supporting student growth.
- Introduce participants to the concept of smart classrooms and their practical implementation.

Deliverables

- Enhanced understanding of innovative educational leadership principles.
- Developed skills in applying design thinking and problem-solving in educational contexts.
- Increased knowledge of child entrepreneurship and its pedagogical implications.
- Familiarity with the impact of digital technology on education and the effective use of educational technology tools.
- Developed skills in data-driven instruction and personalized learning.
- Enhanced mentorship skills for guiding and supporting student growth.
- Understanding of the concept of smart classrooms and their implementation.
- Increased confidence in applying innovative teaching methodologies.

Pedagogy

This programme utilizes a dynamic and interactive approach, combining lectures, group discussions, hands-on workshops, case studies, school visits, and expert insights. Experiential learning and the use of technology are integral to fostering a deep and engaging learning experience for participants.

Target Audience

The Programme has been designed for School Educators and Teacher Educators.
