<i>Foreword</i>	xv
<i>Preface</i>	xvii
<i>Preface to the First Edition</i>	xix
<i>Acknowledgements</i>	xxiii
1. Technology and Innovation Management—Conceptual Foundation.....1–30	
1.1 Introduction	1
1.2 What are the Major Takeaways from the Book?	4
1.3 Concept and Meaning of Technology	5
1.4 Elements of Technology	7
1.5 Product and Services	8
1.6 Brief History of Technology Development	9
1.7 Characteristic of Technology	10
1.8 Evolution and Growth of Technology	13
1.8.1 Abernathy and Utterbach (A-U) Model	13
1.8.2 Thomas S. Kuhn’s Model	14
1.9 Technology Growth due to Self-organising System	14
1.10 Impact of Technology on Society and Business	15
1.11 Technology Typology (Forms of Technology)	17
1.12 Understanding Strategy in Technology Management Context	20
1.12.1 How does a Firm Create Value	21
1.12.2 How does a Firm Deliver Value	22
1.12.3 How does a Firm Capture Value	22
1.13 Role of Technology in Formulating and Implementing Strategy of a Business	23
1.14 Significance of Technology Management for Managers	23
1.15 Innovation in Business Using Technology is Key Differentiator	24
1.16 Management of Technology (MOT)	24
1.17 The Conceptual Framework for Management of Technology	25
1.17.1 Drivers of Technology Management	26
1.17.2 Role of Chief Technology Officer	27
1.18 Summary	28
<i>Review Questions</i>	28
<i>Assignment Questions</i>	29

CASE STUDY NOKIA SELLS HANDSET BUSINESS TO MICROSOFT	29
Additional Readings	30
2. Technology Strategy	31–55
2.1 Introduction	31
2.2 What is Competitive Advantage?	32
2.3 Sources of Competitive Advantage	32
2.4 Strategic Actions and Role of Technology	34
2.5 Technology as Value Creator	35
2.6 Can We get Competitive Advantages through Technology?	37
2.7 Technology Impact on Management Layers	39
2.8 Linking the Role of Technology in Product and Process Development	41
2.9 Role of Technology in Innovation	42
2.10 Five Forces Changing the World	43
2.11 Innovation and Technology are Interdependent	43
2.12 Technology Impact in Defining Organisations Strategies	44
2.13 Role of Government in Technology Development	45
2.14 Linkage between Technology Development and Competition	49
2.15 Managing Research and Development (R&D)	51
2.16 Managing Intellectual Property	52
2.17 Summary	53
Review Questions	54
Additional Readings	55
3. Technology Management	56–69
3.1 Introduction	56
3.2 What is Technology Management?	57
3.3 Need for Technology Management	59
3.4 Technology Management bridges the Gap between Product and Production Requirements	60
3.5 Strategic Role of Technology	60
3.6 Characteristics of Technology Management	61
3.7 Components of Technology Management	62
3.8 Choices for Technology Development and Adoption	63
3.9 Choosing Strategic Alternatives	63
3.10 Lifecycle of Technology and its Impact on Technology Management	64
3.11 Technology Strategy Management Guiding Principles	64
3.12 Three Perspectives of Technology Management	66
3.12.1 Value Creating Technology Management	66
3.12.2 Value Enabling Technology Management	67
3.12.3 Ecosystem Technology Management	67
3.13 Summary	68
Review Questions	68

4. Innovation Management	70–92
4.1 Introduction	70
4.2 Innovation Defined	71
4.3 The Theories of Technological Change	71
4.4 Difference between Innovation and Creativity	73
4.5 Innovation and Creativity in Business Context	73
4.6 Goals of Innovation	75
4.7 Design Thinking Process for Innovation	76
4.8 Sources of Innovation	78
4.9 Innovation Dimensions	79
4.10 Types of Innovation	80
4.11 The Process of Innovation	81
4.12 Innovation Life Cycle	81
4.13 Disruptive and Continuous Innovation	83
4.14 Open and Closed Innovation	85
4.15 Impediments in the Innovation Process	86
4.16 Key Factors that will Promote Innovation	87
4.17 Summary	89
Review Questions	90
Applicative Questions/Project/Team Assignment	90
References	90
CASE STUDY TATA NANO	90
5. Technology Forecasting, Assessment and Acquisition	93–113
5.1 Introduction	93
5.2 Understanding and Monitoring Trends	94
5.3 Methodologies for Studying Technology Trends	95
5.4 Why Forecast Technology Development?	96
5.5 Technology Forecasting Analytical Framework	96
5.6 Technology Forecasting Tools and Methods	97
5.7 Technology Forecasting Techniques and Tools	99
5.8 Technology Foresighting Methodology	100
5.8.1 Technology Assessment	100
5.8.2 Technology Predicting	101
5.8.3 Technology Planning	101
5.9 The Concept of S-curve	102
5.9.1 S-curve for Technology Development	102
5.10 Segment Zero Principle	104
5.11 Technology Development: Supply and Demand Side Perspective	105
5.12 Technology Acquisition	105
5.13 Technology Acquisition Process	106
5.14 Technology Acquisition Strategy	107
5.15 Technology Acquisition Planning	108

5.16	Technology Alliances and Collaboration	108
5.17	Types of Alliances and Collaboration	109
5.18	Timing of Entry of Technology	110
5.19	Summary	111
	Review Questions	112
	Applicative Questions/Project/Team Assignment	112
	Discussion Questions	113
	Additional Readings	113
6.	Product and Process Development and Role of Technology	114–134
6.1	Introduction	114
6.2	Understanding Product Lifecycle Management (PLM)	115
6.2.1	PLM is an Integrated Process	116
6.2.2	Corresponding Technologies at Various Stages of PLM	117
6.3	New Product Development Process	118
6.3.1	How Companies Run New-product Development Process	118
6.3.2	Selecting a Right NPD Process	120
6.3.3	Assimilate the Role of Technology in Product Development	121
6.4	New Product Development Teams	122
6.4.1	Characteristics of a Good NPD Team	124
6.5	Managing Research and Development (R&D)	125
6.6	Intellectual Property Management and Innovation Protection	126
6.6.1	Indian Laws Facilitation IP Protection	127
6.6.2	IP/Patent Management Process	128
6.6.3	Case of IP Infringement Apple vs Samsung	129
6.7	Role of Government in Technology Development	129
6.8	Product Deployment Strategy	130
6.9	Summary	132
	CASE STUDY GRAMUEN SHAKTI	133
	Review Questions	133
	Additional Readings	134
7.	Technology and Business Model	135–152
7.1	Introduction	135
7.2	Business Model Defined	135
7.3	Why do We Need a Business Model?	137
7.3.1	Business Model as New Tool to Beat Competition	138
7.3.2	Business Model is Not Static but Changes Over Time	139
7.4	Success Factors for Business Model	139
7.5	Building Sustainable Business Model	140
7.6	Role of Technology in Business Model Development and Innovation	140
7.7	Successful Business Model	142
7.8	Crafting and Documenting Business Model	145

7.9	Reversing the Value Chain for Business Model Innovation	147
7.10	Emerging Technology Adoption and Exploitation	149
7.11	Business Model Appraisal	149
7.12	Summary	151
	Review Questions	152
	Additional Readings	152
8.	Technology and Innovation Implementation	153–164
8.1	Introduction	153
8.2	Firm's Business Goals, Technology and Innovation Project Implementation and Outcome Objectives	154
8.3	TIM Implementation Process	155
8.4	TIM Implementation Responsibility and Accountability	156
8.5	Role of Chief Technology Officer	156
8.6	CTO Challenges and Suggested Best Practices	157
8.7	Timings of Technology Intervention	160
8.8	How to Measure the Success of Implementation	162
8.9	Summary	163
	Review Questions	163
	Additional Readings	164
9.	An Overview of Existing and Emerging Technology	165–186
9.1	Introduction	165
9.2	Types of Information Systems Used in an Enterprise	165
9.3	Categories of Information Systems within the Enterprise	167
9.4	Enterprise Systems	168
9.4.1	ERP: Enterprise Resource Planning	169
9.4.2	Supply Chain Management (SCM)	170
9.4.3	Customer Relationship Management (CRM)	171
9.5	Decision Support Systems, Data Warehouse, Data Mart	173
9.5.1	Data Warehouse	173
9.5.2	Data Mart	174
9.6	E-Business	175
9.6.1	Types of E-Commerce	176
9.7	Big Data Analytics	178
9.8	Emerging Technologies	178
9.8.1	Internet of Things (IoT)	178
9.8.2	3D Printing	180
9.8.3	Nano-Architecture	181
9.8.4	NeuroMarketing	181
9.8.5	Near Field Communication (NFC)	181
9.8.6	Gamification	182
9.8.7	Apple Pay	184

9.8.8	Project Loon	184
9.8.9	Case: Project Meghraj	184
9.9	Summary	184
	Review Questions	185
	Additional Readings	185

10. Human Aspects and Social Issues in Technology Management.....187–202

10.1	Introduction	187
10.2	Technology and Humanity	188
10.3	Understanding the Importance of Values in Technology and Design	190
10.4	Concept of Stakeholders in Technology Management	190
10.5	Theory of Technological Determinism	191
10.6	Socio Technical Systems and Modeling	191
10.7	Technology Impact on Future of Employment	192
10.8	Technology Risk Management	193
10.9	Technology Risk Assessment and Mitigation	196
10.9.1	Technical Risk Assessment	196
10.10	Technology and Ethical Concerns	196
10.11	Technology and Ethics Research	199
10.12	Summary	199

CASE STUDY INCIDENTS OF TECHNOLOGY LED FRAUD IN BANKS AND FINANCIAL MARKETS ARE RISING 200

Review Questions	201
Additional Readings	202

11. Technology and Sustainability.....203–219

11.1	Introduction	203
11.2	Three Pillars Perspective of Technology and Sustainability	204
11.3	Government and Policy Makers Perspective	205
11.3.1	Various Government Actions for Green Technology	205
11.4	Technology Provider Perspective	207
11.5	Defining Enterprise Green Tech Strategy	208
11.5.1	Enterprise Green Tech Strategy (EGTS) Development	209
11.6	Technology User Perspective	212
11.7	Role of IT in Greening the Enterprise	213
11.8	Diffusion of Green Technology and IP Rights	215
11.9	Summary	216
CASE STUDY A	GREEN TECHNOLOGY MASTER PLAN OF GOVERNMENT OF MALAYSIA	217
CASE STUDY B	TIRUPUR FIRST TO ARRIVE AT ZERO LIQUID DISCHARGE TECHNOLOGY	218
Review Questions	219	
Additional Readings	219	

12. Innovation Driving Industry 4.0 and Fourth Industrial Revolution.....220–238

12.1	Introduction	220
12.2	Introducing Fourth Industrial Revolution	220
12.3	Third Industrial Revolution also Called Digital Revolution	223
12.4	Fourth Industrial Revolution	224
12.5	Industry 4.0, is this Different?	225
12.6	Five Laws of Emerging Technology	226
12.7	Combined Effect of all these Laws	228
12.8	Is it Advantage to Startups or Handicap to Established Players?	229
12.9	Changes in Innovation Paradigm with I4.0	229
12.10	Ushering Innovation 4.0	230
12.11	Societal Value of Innovation 4.0	233
12.12	Leadership in Fourth Industrial Society	234
12.13	Summary	234

CASE STUDY A PAYTM GROWTH IN INDIA 2000–2020: A CASE OF CONTINUOUS ECO SYSTEM INNOVATION 235

CASE STUDY B CREATING A GLOBAL EDUTECH START-UP FROM INDIA, BYJU 237

Review Questions	238
Additional Readings	238

13. Design Thinking for Innovation239–250

13.1	Introduction	239
13.2	History of Design Thinking	240
13.3	What Constitutes a Good Design?	240
13.4	A Good Design Always Surprises a Customer and Meets Unstated Needs	241
13.5	What is Design Thinking?	242
13.6	Why Design Thinking Approach?	243
13.7	IDEO's Design Thinking Approach	244
13.8	Stanford Design Thinking Approach	245
13.9	IBM Design Thinking Approach	246
13.9.1	IBM Design Thinking Additional Features	247
13.10	Unique Characteristics of Design Thinking	248
13.11	Success Stories of Design Thinking	249
13.12	Challenges and Remedial Measures while Adopting Design Thinking	249
13.13	Summary	250
Review Questions	250	
Additional Readings	250	

Appendix Key Technology Impact in Select Industries.....	251–258
Multiple Choice Questions.....	259–272
Index.....	273–275
